

## Utilize the CLIPS to:

A) **Connect BUILD units:** Securely link up to three BUILD units per clip for stability.\*

## B) Mount BUILD units on the wall:

Use suitable wall plugs and screws for reliable installation; professional installation is recommended.

**STEP 1** Determine the desired location and layout for your BUILD shelving.

**STEP 2** Position a BUILD unit with 1 clip at the back.

Additional clips can be added after the first clip is fixed to the wall.

**STEP 3** Mark the middle hole of the clip on the wall.

For added stability: use up to 4 wall plugs and screws.

**STEP 4** Take the BUILD unit down, screw the clip into the marked hole on the wall.

**STEP 5** Push the BUILD unit over one of the 3 tubes of the fixed clip.

**STEP 6** Position and push the next BUILD unit over the same clip.

Repeat **STEPS 2-6** for each BUILD unit.

\* Note: Break the clip at the predetermined breaking point to avoid it visibly sticking out.

*Safety Warning: Use pincers to break the clip, beware of sharp edges. Wear protective gloves and goggles.*
