

A modern lounge interior featuring white modular furniture and a decorative partition. The room has a herringbone wood floor, a large window with ornate glass, and a chandelier. The furniture includes a sofa, ottomans, and a coffee table. A decorative partition made of white cylindrical elements is visible in the background.

THE SKY'S THE LIMIT

Flexibility, mobility and sustainability are the pillars of MOVISI. The German company was founded in 2009 and specialises in manufacturing modular and multifunctional furniture such as partition systems, modular shelving and seating furniture for offices, home offices, modern homes, fairs, events and other environments where flexible or temporary solutions are needed.

Assembly requires no tools or special expertise, and can be carried out by just one person in a matter of minutes. Being lightweight and easy to handle Movisi furniture cuts down on transport and construction costs.

Movisi works with some of today's hottest designers to create furniture that reflects your individuality.

The collection brims with products that permit the user to 'design' their own compositions.

The light bright practicality of Movisi furniture is bound to energise you, and those around you.

Made in Germany

QUALITY & SUSTAINABILITY FIRST

There is no substitute for quality. This is why we only use carefully selected materials that fit with our philosophy, which is to provide you with creative freedom and flexibility. Movisi wants to secure good quality as well as take on social responsibility. This is why our products are manufactured in Germany and adhere to strict ecological and socially-responsible production methods.

But quality means even more at Movisi. From research to final product, we monitor every step of our design, manufacturing and marketing processes to provide the finest quality product and most rewarding customer experience for you.

All our modular systems are made from a mono-material called ARPRO® (Expanded Polypropylene), a lightweight high performance plastic foam, which is 100% recyclable, toxic free, emission free, allergy friendly, energy absorbing, easy to clean and extremely light (95% air).

ONLY THE BEST

LINK PARTITION

LINK is a freestanding modular partitioning system that features units that link together to create free-standing partitions and room dividers for different interior settings.

Quick to construct and quick to change; unique and diverse in its capabilities to modify its design as many times as the end user chooses. Assembly requires no tools or special expertise and can be done by just one person.

A LINK wall can also be accentuated by the use of coloured lighting or projections.

A flexible and durable system, LINK works in the following environments:

- **Office:** reception, break out, informal meeting areas.
- **Exhibitions and events:** booths, shrouding walkways, creating temporary press or cafe areas.
- **Retail:** shop displays, wall cladding, back drops.

AT HOME

What's behind this screen? Is it a **home office space**, a dining area, a chill-out zone? Create whatever space you need wherever you need it with LINK.

This free-standing DIY room divider and partition provides a stylish, flexible, and affordable solution for increased privacy. The modular design means you can easily rearrange the configuration as your needs change or simply store them away when you're done.

LINK is a profoundly simple and innovative solution to space-making in a home or office. With this easy partitioning system in hand, you'll find yourself seeing new opportunities for creating novel, attractive spaces within your existing rooms.

ACCESSORIES: FILLER PLATES

Take your LINK customized space a step above and improve acoustics with filler plates in a range of carefully selected colors. These felt-like plates are made from upcycled plastic bottles (PET, minimum post-consumer content 60%) and add style with minimal weight and fuss. They also provide additional privacy and acoustic screening.

Match your corporate branding or complement your home office décor. Plate for a meeting, remove to let natural light back in. It's as simple to implement, as lightweight and environmentally conscious, as all our furnishings. The filler plates allow you to create a fully or partially closed screening. This can add an element of privacy and improve acoustic properties.

Colours: available in many colours. [Click here for more.](#)

SUSTAINABILITY & DESIGN PHILOSOPHY

Sustainable furniture production

We are always working on minimizing our business operations' impact on the environment. MOVISI products adhere to strict ecological and socially responsible production methods. MOVISI furniture is 100% recyclable, entirely toxin-free and 100% made in Germany.

Green power: our offices and our warehouse are powered by 100% green electricity from Greenpeace. 100% free of CO2 emissions. Power/electricity is mostly generated from eco-friendly hydropower.

Minimal packaging: MOVISI furniture is very light in weight: this means that CO2 emissions are reduced during transport as less fuel is needed to move the goods. We avoid unnecessary packaging. Our goal is to keep waste towards zero. This is why we only use cardboard boxes for packaging our modular furniture. No additional packaging and padding material is being used.

Lightweight transport: our furniture is very light in weight: this means that CO2 emissions are reduced during transport as less fuel is needed to move the goods.

Light, flexible and customisable

We think that everyone should have more choices when it comes to the character of their home decor or office environment. Our aim is to offer you endless interior design possibilities. MOVISI does not dictate a style, but rather allows you to establish your own personal style with furniture that you can customise and change as it suits you. The results can be unexpected, individual and dynamic. You are in control. The furniture changes with a whim, and with minimum effort. The results can be as surprising and evocative as your own imagination - furniture that adapts to your needs. The interchangeable components make the furniture dynamic and responsive to changing needs. These characteristics combine to make MOVISI one of the world's most unique range of furnishings available anywhere today.
